

# America's Boating Club® Seminars

## Why Become a Licensed Captain?

A seminar to understand advantages and disadvantages!

Where: On-line via Free Conference  
Call

When: District 5 On-line Conference  
1430 - 1530,  
November 5<sup>th</sup>, 2020

We recreational boaters focus on safety on the water. We study Boat Handling, Marine Navigation and many boat systems, and often help others understand and use their boats.

And we often do not recognize how near our training and activities approach professional status.

Several ABC Members have taken that next step and achieved a US Coast Guard Captain's License.

This seminar is presented by ABC members who are also members of the Chesapeake Area Professional Captains Association (CAPCA).

### The seminar provides information on:

- How ABC Courses helped prepare members to get a captain's license
- The process to obtain a US Coast Guard Captain's License
- The types of licenses
- The activities where a captain's license is needed
- The benefits and disadvantages of having a license
- The CAPCA organization's activities and services.

There will be time for your questions.

**Useful information of interest to all members.**

**Identifies the CAPCA Organization's activities and services**

We look forward to seeing you in this Seminar. If you have any questions, please do not hesitate to contact the DEO or ADEO. Your Educational Department team welcomes the opportunity to be of service.
